

Amendments to the Specification:

Amend the paragraph beginning at page 5/line 24 as follows:

In Formula (1), Ar¹ and Ar² independently represent the atoms necessary to complete ~~form~~ an aromatic ring group, such as a phenyl ring group or a pyridine ring group. Ar³ represents the atoms necessary to complete ~~form~~ a six-membered ~~hetero~~aromatic ring group, such as a pyridine ring group. In addition, Ar³ and Ar¹ as well as Ar³ and Ar² may join together to form rings. X represents a halide, such as Cl or F. In one desirable embodiment, X represents F.

Amend the paragraph beginning at page 9/line 12 as follows:

In Formula 5a, Ar⁴ and Ar⁵ independently represent the atoms necessary to complete ~~form~~ a five or six-membered aromatic ring group, such as a pyridine group. X^a and X^b represent independently selected substituents, such as fluoro substituents.
